Dipti Dake

Software Developer | .NET Full-Stack Developer
(+91) 8767434722 | diptidake777@gmail.com | Linkedin | GitHub

PROFESSIONAL SUMMARY

Software Developer and .NET full-stack developer who builds REST APIs with C#, ASP.NET Core Web API, ADO.NET and SQL Server, with Angular front ends. Built two full-stack projects featuring JWT authentication, role-based authorization and stored-procedure-driven data access, including a deployed application with CI/CD (GitHub Actions) and AI-assisted features. Currently working in an Agile/Scrum team on a live project, using Git, GitHub and Jira.

TECHNICAL SKILLS

Backend: C# | ASP.NET Core Web API | REST APIs | ASP.NET Core MVC | ASP.NET MVC | .NET Framework | ADO.NET | Entity Framework Core | LINQ
Frontend: Angular | HTML5 | CSS3 | Bootstrap 5 | JavaScript | Razor Views
Database: SQL Server | Stored Procedures
Security: JWT Authentication | Role-Based Access Control (RBAC) | Password Hashing | Account Lockout | Rate Limiting
Testing & Tools: xUnit | Unit Testing | Postman | Swagger | Visual Studio | Jira | GitHub Actions (CI/CD)
Version Control & Deployment: Git | GitHub | SVN (TortoiseSVN) | IIS | Web Deploy
Other: C | C++ | Azure (basics) | OOP | Data Structures | MVC Architecture | Clean Architecture | Agile/Scrum

PROFESSIONAL EXPERIENCE

Software Developer – Zest India Pvt Ltd Aug 2026 – Present

- Contribute as part of an Agile/Scrum team on a live project, taking part in sprint ceremonies and tracking work items in Jira.
- Work with the team on .NET backend APIs, using Git and GitHub for version control.

PROJECTS

DeskPilot – Enterprise Service Desk & Request Management Platform October 2026

ASP.NET Core 9 Web API | Angular 21 | C# | ADO.NET | SQL Server | JWT | GitHub Actions

Links: Live-Demo | DeskPilot-GitHub

- Built and deployed a role-based service desk (Admin, Employee, Technician) with an ASP.NET Core 9 Web API, an Angular 21 frontend and SQL Server, using ADO.NET and 34 stored procedures.
- Implemented JWT authentication, password hashing, account lockout, per-IP rate limiting, and role-based access enforced in both the API and the database layer.
- Designed a request workflow with per-role status transitions stored in the database, a status-history timeline, comments, a technician workload limit with transactional row locking, and technician recommendations by specialization and workload.
- Added optional AI assistance (Groq with Gemini as an alternative) for classification, description improvement, request summaries and reply drafts, with daily usage caps and a graceful fallback when AI is off.
- Set up CI/CD with GitHub Actions that builds Angular and .NET, then deploys to IIS with Web Deploy on every push to main. Secrets live in GitHub and hosting environment variables, and the app runs from a single origin.

Career Bridge – Placement Portal April 2026

Angular | ASP.NET Core Web API | C# | ADO.NET | Microsoft SQL Server | JWT | Bootstrap 5

- Developed a full-stack Placement Portal using Angular, ASP.NET Core Web API, C# and SQL Server, with secure Admin, Teacher and Student role-based access using JWT authentication.
- Designed and implemented a normalized SQL Server database with 10+ tables and 15+ stored procedures using ADO.NET to support efficient CRUD operations.
- Built RESTful APIs and responsive Angular interfaces for student registration, profile management, placement drives, resume management and application tracking, applying Clean Architecture and the Repository Pattern and testing APIs with Swagger and Postman.

EDUCATION

B.E. Information Technology – CGPA 7.38 2021 – 2025

JSPM's Bhivrabai Sawant Institute of Technology & Research, Pune
12th (HSC) – St. Saviour's High School & Junior College – 81.83%
10th (SSC) – Janata Kanya Vidyalaya, Kashti – 86%

CERTIFICATIONS & ACHIEVEMENTS

.NET Full Stack Developer Certification – My Tech Focus | Campus Lead – Algo Zenith Technical Club (2023)
